Description:

CBRE is pleased to offer this opportunity to purchase a new private 12,000 SF executive hangar facility at the Billings Logan International Airport. The hangar is currently under construction and features a 100' x 28' door, two overhead garage style doors, radiant tube heater, and LED lighting. Montana has been an increasingly popular base of operations in recent years, and this hangar facility offers a great value.

Photo is an example of a completed hangar in the same development with an identical floorplan at Billings Logan International Airport
