Modern Hangars with Sturdy Steel Construction

Conroe-North Houston Regional Airport is your aviation gateway to The Woodlands, Spring, and the Greater Houston area. The airport serves business and recreational travelers with two runways, two FBOs, multiple instrument approaches, and an on-site US Customs Station for international flights.

Our private aircraft hangars are located at the CXO Airport and have solid steel construction, quality lighting, and 24-hour climate control, keeping your investment safe and secure.

With over 10,000 square feet of combined hangar space available throughout the Conroe Airport, we can accommodate piston, turboprop, or jet aircraft including many models of King Air, Citation, or Learjet Aircraft on a temporary or ongoing basis.

The motorized, bi-fold hangar doors open and close with the touch of a button. There is quick and easy access with a coded entry automatic gate. The hangars feature WiFi and a community restroom for your convenience.
