Description:

CBRE is pleased to offer this exclusive aircraft hangar for sale at the Monterey, California Airport. The facility is contiguous to the Monterey Jet Center, a convenient location with many amenities. Completed in 2007, the facility is like new and features a 14,300 square foot hangar bay that could be configured for a variety of aircraft storage scenarios. This is an excellent opportunity for an aircraft owner to secure a private hangar close to the Bay Area and Silicon Valley, where hangar space is scarce and significantly more expensive.
