Width 60 Depth 32 Height 12

Description:

Oversized end unit in the Wiscasset Airport Hangar Condominium Association. In 2003, WAHCA was formed and built 24 airplane hangar condo units in two separate buildings on a portion of the airport property. Ample space for most single-engine aircraft, it is currently home to a twin, providing rental income. Extra storage space to the right side, includes a custom-built floor-mounted winch used to pull aircraft back into the hangar. Unit is separately metered for power.
