Width 80 Depth 60

Description:

One of the largest executive hangars available at Steamboat Springs City Airport, this 4,606 sq. ft. hangar was built in 2014 with an interior space of 60' x 80'. The unit is well insulated, fully heated, and has a bi-fold electronic 18' hangar door spanning the entire 80' width. The end-unit location makes for easy maneuvering and the southern exposure keeps the apron ice free most of the winter. The unit includes great lighting and is plumbed for a bathroom. All SBS hangars are a ground lease. Bob Adams is a full service FBO and offers the following amenities: Aviation fuel, oxygen service, aircraft parking, passenger terminal and lounge, aerial tours/sightseeing, aircraft charter, catering, courtesy transportation, and rentals cars on-site. Visit the City of Steamboat Springs website at <http://www.steamboatsprings.net/333/Steamboat-Springs-Airport> for additional SBS Airport information.
