---

Width 42' Depth 51' Height 20'

**Description:**

I had a C-140 & a C-172 stored w/ plenty of room for toolboxes, desks, chairs, tables, benches, and aircraft parts on shelves. There are quad electrical outlets around the perimeter for convenience. Two engineered 18" structural I-beams span the width of the hangar for unobstructed movement, and for using a dolly and chainfall, or electric hoist.
