Width 42' Depth 51' Height 12'

**Description:**

Two-plane hangar w/electrically-operated bifold door, w/two entrance doors. Professionally engineered and constructed to eliminate vertical columns for ease of movement within unit. Electrical quad-box outlets, (supplied by ckt brkr panel within hangar), around perimeter, for convenience. 125 psi air is plumbed into hangar, available 24/7. Has two 18" structural beams that can, easily, support chainfall dollies for lifting. Taxiways/aprons are fairly new, (5 yrs). Was used for live storage for C-140 and C-172.
